Triumphs and Challenges of Mobile Data Collection

Mobile data collection is here and it's here to stay. While this is great, we need to be careful about how we implement it. Working with lines, polys and data entry on a screen in the field is not always easy.

Join us as Gareth Humphreys (WTMA) walks us through the challenges and triumphs of setting up a mobile data collection app for the yellow crazy ant eradication program!

\$5 for members, \$10 for non-members, Students FREE
